NUTRI LAY JONG HEN / PULLET

UITGROEI / DEVELOPER

NUTRI FEEDS

KLAS: PLUIMVEE UITGROEIVOEDSEL

Die produk word aanbeveel tydens die laaste gedeelte van die groeifase, vanaf 15 weke tot en met punt van lê. Die produk met *ad lib* gevoer word.

Indien die hen se liggaamsgewig swaarder is as wat die ras standaard aanbeveel op 15 weke, dan word die rantsoen aanbeveel. Die nutriënt digtheid is laer in die rantsoen, wat die produsent in staat sal stel om die liggaamsgewig van die hen te beheer en sodoende sal verhoed dat die hen oorgewig word.

CLASS: POULTRY DEVELOPER FEED

This product is recommended during the final part of the growth phase, from 15 weeks up to point of lay. The product should be fed *ad lib*.

If the body weight profile is heavier than that recommended by the breed standard at 15 weeks, this ration is recommended. The nutrient density of the ration is lower, which enables the producer to control the hen's body weight and prevent the hen from becoming overweight.

VOERPROGRAM

FEED INSTRUCTION

Voer Vorm	Meel / Korrels	Mash / Pellets	Feed Form
Dae	15 weke tot punt van lê	15 weeks to the point of lay	Days
Inname (g/kuiken)	<i>ad lib.</i>	<i>ad lib.</i>	Intake (g/chick)

SAMESTELLING

(g/kg)

COMPOSITION

Proteïen (min)	120	Protein (min)
Totale Lisien (min)	4.5	Total Lysine (min)
Vog (maks)	120	Moisture (max)
