

(V17775; NFF3419)

NUTRI LAY JONG HEN / PULLET

VROEË LÊ /
PRE-LAY

NUTRI FEEDS

**KLAS: PLUIMVEE GROEIVOEDSEL**

Die produk word laat in die groeifase aanbeveel, vanaf 15 weke tot punt van lê. Die produk moet *ad lib* gevoer word.

Hierdie produk het 'n hoë nutriënt digtheid, wat daarop gemik is om die liggaamsmassa van die hen te onderhou volgens die ras standaard. Indien die hennep op 15 weke baie swaarder is as wat die ras standaard aanbeveel, moet die **Jong Hen Uitgroe**i produk gebruik word, wat 'n laer nutriënt digtheid het om die liggaamsmassa te beheer en te verhoed dat die hennep oorgewig raak.

CLASS: POULTRY DEVELOPER FEED

This product is used during the late growing phase, from 15 weeks to point of lay. The product should be fed *ad lib*.

This product has a high nutrient density that is aimed at maintaining the hen's body weight according to the breed standard. Should the hen be much heavier than the breed standard at 15 weeks, the **Pullet Developer** product should be used, which has a lower nutrient density. The aim is to control the body weight and prevent the hen from becoming overweight.

VOERPROGRAM**FEED INSTRUCTION**

Voer Vorm	Meel / Korrels	Mash / Pellets	Feed Form
Dae	15 weke tot punt van lê	15 weeks to the point of lay	Days
Inname (g/kuiken)	<i>ad lib.</i>	<i>ad lib.</i>	Intake (g/chick)
