VOLLEDIGE / COMPLETE KALFAANVANGS 18 CALF STARTER 18

KLAS: VOLLEDIGE KALFVOEDSEL

Nutri Volledige Kalfaanvangskorrels 18 is 'n goed gebalanseerde volledige voer vir kalwers vanaf 0 tot 3 maande ouderdom, vir optimale groei en rumenontwikkeling.

Hierdie program vorm die basis van die suksesvolle lewenslange produksie van die melkbees.

CLASS: COMPLETE CALF FEED

Nutri Complete Calf Starter Pellets 18 is a well-balanced feed for calves from 0 to 3 months old, aimed at optimum growth and rumen development.

This program forms the basis of the successful lifelong production of the dairy cow.

<p>kalwers gegee te word wat vir die eerste keer kolostrum kry nie.</p> <p>Teenliggame in hierdie kolostrum kom teen baie lae peile voor.</p>			<p>be given to calves as their first intake of colostrum.</p> <p>This colostrum contains very low levels of antibodies.</p>
<p>1 liter per 10 kg liggaamsmassa.</p> <p>Maksimum 6 liter per dag.</p>	<p>Dag / Day 4 - 28</p>	<p>Melksurrogaat / Milk surrogate</p>	<p>1 litre per 10 kg of body weight.</p> <p>Maximum of 6 litres per day.</p>
<p>Vrye toegang, maar altyd vars (gee klein hoeveelhede gereeld, verwyder ou nat voer daaglik en hou voerbak skoon).</p>		<p>4205 Nutri Melk Volledige Kalf Aanvangs 18 / 4205 Nutri Milk Complete Starter 18</p>	<p>Free access, but always fresh (give small quantities regularly, remove old, wet feed daily and keep feed trough clean).</p>
<p>Vrye toegang. Vervang daaglik. Verwyder tydens melkvoeding en hou weg van kalwers vir ongeveer 2 tot 3 ure daarna.</p>		<p>Skoon water / Clean water</p>	<p>Free access. Replace daily. Remove during milk feeding and keep away from calves for 2 to 3 hours afterwards.</p>
<p>Geen addisionele hooi moet gevoer word voordat die inname van die Nutri Melk Volledige Kalfaanvangskorrels 1 tot 1.2 kg per dag bereik nie. Sodra die inname 1 tot 1.2 kg per dag is, moet hooi vrylik beskikbaar wees.</p>		<p>Goeie kwaliteit hooi / Good quality hay</p>	<p>No additional hay should be provided before 1 to 1.2 kg of Nutri Milk Complete Calf Starter pellets per day are consumed. As soon as the consumption is 1 to 1.2 kg per day, hay should be freely available.</p>
<p>Vrye toegang.</p>	<p>Speen* tot 3 maande ouerdorm / Wean* up to 3 months old</p>	<p>4205 Nutri Melk Volledige Kalf Aanvangs 18 / 4205 Nutri Milk Complete Starter 18</p>	<p>Free access.</p>
<p>Vrye toegang sodra die inname van die Nutri Melk Volledige Kalfaanvangskorrels 1 tot 1.2 kg per dag is.</p>		<p>Goeie kwaliteit hooi / Good quality hay</p>	<p>Free access as soon as 1 to 1.2 kg of Nutri Milk Complete Calf Starter per day is consumed.</p>
<p>Vrye toegang.</p>		<p>Skoon water / Clean water</p>	<p>Free access.</p>

*** Speen:**

Sodra die kalf meer as 500 g per dag van die **Nutri Melk Volledige Kalfaanvangskorrels** inneem en ten minste 4 weke oud is, kan die hoeveelheid melkvervanger wat die kalf ontvang, halveer word. Dit kan na 'n week gestaak word.

***Weaning:**

As soon as the calf consumes more than 500 g **Nutri Milk Complete Calf Starter** pellets per day and is at least 4 weeks old, the quantity of milk replacement the calf receives can be halved. This can be discontinued after a week.
