

(V 29622; NFF 3926)

NUTRIMOL MELASSEMEEL / MOLASSES MEAL

KLAS: ENERGIE AANVULLING

Nutrimol is 'n smaaklike energie-aanvulling vir herkouers, perde en wild.

- Weens die hoë melasse-inhoud daarvan is dit ideaal vir die verdere vermenging met plaasgeproduseerde grondstowwe van hoë proteïenwaarde in 'n verskeidenheid van rantsone vir skape, beeste en suiwelbeeste;
- Dit kan effektief gebruik word om 'n deel van die graan in finale rantsone te vervang;
- Die voedingswaarde daarvan vergelyk goed met die van melassemeel en kan effektief vir die doel as melassevervanger aangewend word.
- In beesvoerkrale kan tot 25% en in skaapvoerkrale tot 15% **Nutrimol** in rantsone ingesluit word as smaakmiddel en om stowwerigheid te beperk.

CLASS: ENERGY SUPPLEMENT

Nutrimol is a palatable energy supplement for ruminants, horses and game.

- Because of its high molasses content it is ideal for further mixing with farm produced raw materials with a high protein value in a variety of rations for sheep, cattle and dairy cows;
- It can be used effectively to replace a part of the grain in final rations;
- The nutritional value compares well with that of molasses meal and it can be used effectively as a molasses meal replacement.
- In cattle feedlots up to 25% and in sheep feedlots up to 15% **Nutrimol** can be included in rations as a flavouring and to limit dust.
