

(V 14994; NFF 1133)

NUTRI TUB PROTEÏEN / PROTEIN

KLAS: PROTEÏEN, MINERALE EN SPOORMINERALE SUPPLEMENT VIR HERKOUERS

Nutri Tub Proteïen is 'n proteïen, minerale en spoorminerale aanvulling vir herkouers (beeste, skape en bokke). Voer *ad lib.* aan diere op goeie kwaliteit winterveld waarvan die hoeveelheid voldoende is.

CLASS: PROTEIN, MINERAL AND TRACE MINERAL SUPPLEMENT FOR RUMINANTS

Nutri Tub Protein is a protein, mineral and trace mineral supplement for ruminants (cattle, sheep and goats). Feed *ad lib.* to animals on good-quality winter grazing available in sufficient quantities.

SAMESTELLING

45 kg tub

(g/kg)

Proteïen (min)	280
Ureum (maks)	20
% vanaf Ureum (maks)	20.5
Totale proteïen vanaf NPN (maks)	81%
Vog (maks)	120
Kalsium (maks)	33
Fosfor (min)	11
Magnesium (min)	6
Kalium (min)	22
Swawel (min)	5

(mg/kg)

Yster (min)	140
Koper (min)	28
Mangaan (min)	110
Sink (min)	110
Kobalt (min)	0.3
Jodium (min)	1.5
Selenium (min)	0.3
	IE/IU
Vitamien A (min)	12 000

COMPOSITION

45 kg tub

Protein (min)	
Urea (maks)	
% from Urea (maks)	
Total protein from NPN (maks)	
Moisture (maks)	
Calcium (maks)	
Phosphorus (min)	
Magnesium (min)	
Potassium (min)	
Sulphur (min)	

VOERAANBEVELINGS

(g per dag/day)

Beeste (min/maks)	540 / 650
Skape en Bokke (min/maks)	90 / 120

FEED INSTRUCTION

Cattle (min/max)	
Sheep and Goats (min/max)	

Sien NPN Waarskuwing op bladsy 06.

Die kondisie van die diere moet gereeld gemonitor word, veral gedurende die laat winter (Augustus tot September) wanneer 'n proteïen lek oorweeg moet word om aan die verhoogde voedingsbehoefes van lakterende en eerstekalf koeie te voorsien.

See NPN Warning on page 07.

The condition of the animals should be monitored regularly, particularly during the late winter (August to September), when a protein lick should be considered to meet the increased nutrient requirements of lactating and first-calf cows.
